

Tank inspection in practice

To prepare for our visit

To carry out the tank inspection, we need:

- Access to an accessible and working plug socket (min. 16A). In the absence of which, the inspection will be terminated. We will not be able to issue a certificate, but a flat rate of €150 (tax included) will be invoiced for a cancellation at your fault.
- Access to the boiler.
- For inaccessible tanks, an effective **level** of liquid fuel that is less than **80% of the tank's capacity** to be able to carry out the test. If it is too high, the inspection will be terminated. We will not be able to issue a certificate, but a flat rate of €150 (tax included) will be invoiced for a cancellation at your fault.

Please also have the following items available:

- Certification of compliance of the lining of the wall **(if applicable)**.
- For an above-ground tank: exemption provided by the authorities regarding the need for a spill containment system **(if applicable)**.
- For an **underground tank**:
 - Certification of the corrosiveness of the ground.
 - Certification or possible exemption of cathodic protection.

Furthermore, we will need **where possible** the following items:

- The name and/or brand of the manufacturer.
- The number and year of manufacture.
- The capacity in litres.
- The water resistance certificate from the tank factory.
- The nature and type of tank.
- The tank's certificate of compliance.
- The tank's installation date.
- The certificate attesting the installation of the tank and its connection in accordance with the current requirements issued by a qualified expert.
- The routine water resistance certificate of the entire installation issued by an approved engineer.
- The data sheet for the materials used to waterproof the spill containment system.

We would also like to draw your attention to the fact that a class 3 declaration must be returned to the municipality. You will find below the link that allows you to download the said class 3 declaration form to send to your municipality.
